How did you hear about us?	
Application Details	
What material are you dispensing? (adhesive, fluid, cyanoacrylate, RTV, etc)	
Who manufacturers this material?	Name:
	Part #:
How many components make up this material?	<input type="checkbox"/> One part <input type="checkbox"/> Two part Other (specify):
What is the packaging/style you are working with? (3 cc syringe, 50 ml side by side, 300 ml cartridge, etc)	
What is the viscosity of the material (cP)?	
Does the material required secondary processing? (UV cure, heat in oven, timed air cure, etc)	If yes, please explain:
What type of dispense pattern is needed? (Bead, dot, etc)	
What is the required cycle time of the process?	
Are you currently using a dispense system? If yes, is it working and/or what would you like to improve?	
What material are the parts you are dispensing onto? (ABS plastic, 304 stainless, etc)	
Describe your part geometry:	Gap sizes, channel to hold adhesive or flat surface?
	Size and area to be dispensed onto:
Please list any additional special requirements:
